# CliCNord Research Project

Newsletter N°2 - November 2021

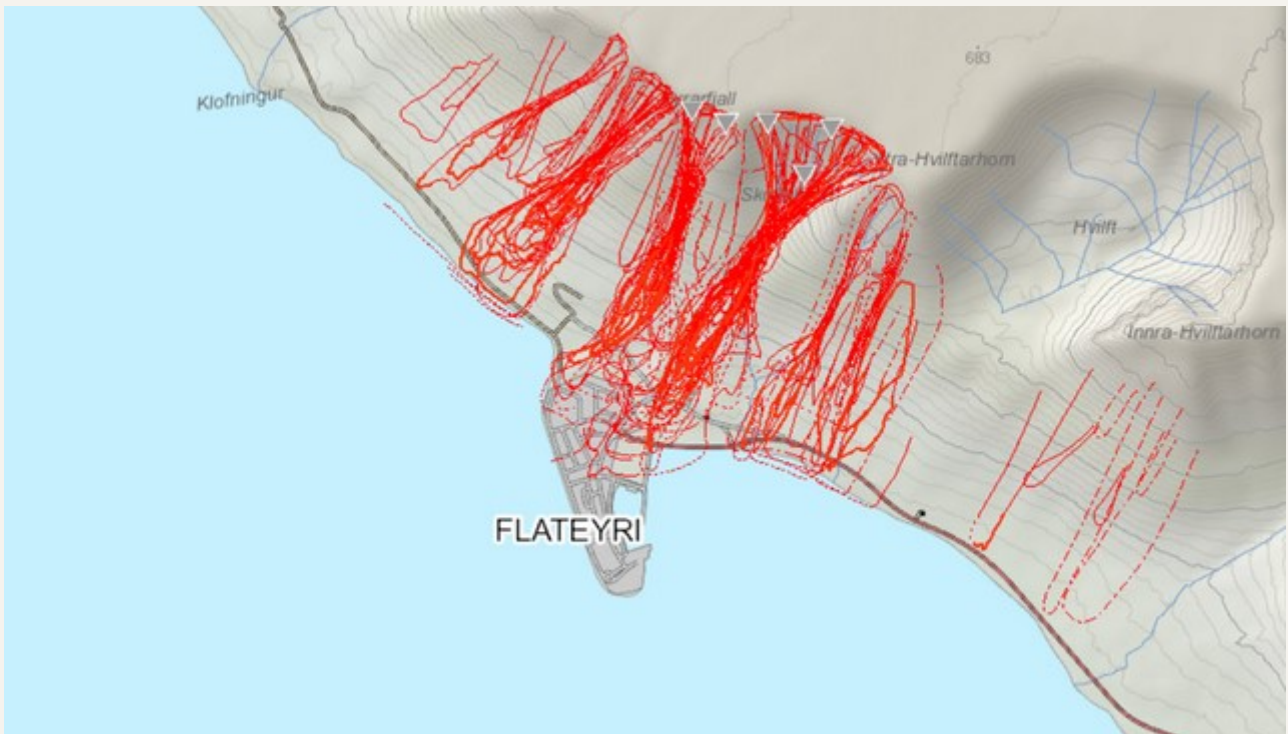

During the last months, we have dived deeper into the CliCNord cases, and all eight cases are now presented on the website. So, now you can read about avalanches in Iceland, landslides and flash floods in Norway, temperature extremes in Sweden, and flooding and cloudbursts in Denmark. Use links below...

In all the cases, we are looking into how these very different hazards, that are regarded as being affected by a changing climate, are affecting small remote rural communities across the Nordic countries.

**The Norwegian case with  
flash floods**

**The Icelandic case with  
avalanches**

**The Norwegian case with  
landslides**

**The Swedish case with  
temperature extremes**

The Danish case with  
flooding from the sea

## The Danish case with cloudbursts

## COP26 in Glasgow - CliCNord presented the project

CliCNord was invited by NordForsk to present the project at The Nordic Council of Ministers and The Nordic Council pavilion at COP26 - UN Climate Change Conference in Glasgow.

See the CliCNord  
Presentation at COP26

This project has received funding from the NordForsk Nordic Societal Security Programme under Grant Agreement No. 97229
