

Climate  
Change  
Resilience in  
Small  
Communities in the  
Nordic Countries

This project has received funding from the NordForsk Nordic Societal Security Programme under Grant Agreement No. 97229

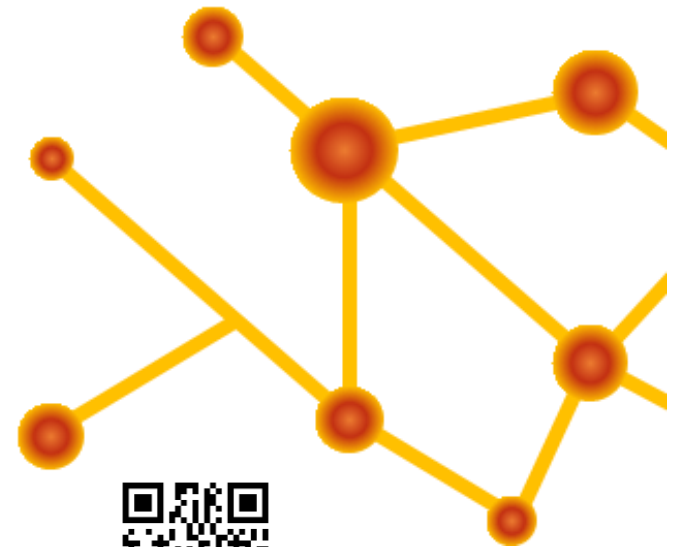

Climate change is also affecting the Nordic countries. Many small communities will be affected by an increasing number of devastating natural events.

The Climate Change Resilience in Small Communities in the Nordic Countries project (CliCNord) focuses on how to increase capacity building in small communities to meet the effects of climate change.

The project will investigate:

- How small communities understand their situation in relation to climate change?
- How they handle climate-related challenges?
- How competencies and resources among the local citizen can help build capacity?
- The circumstances regarding the citizen's need for help from the established system and civil society organizations?

# CliCNord includes several very different hazards affecting small communities across the Nordic countries

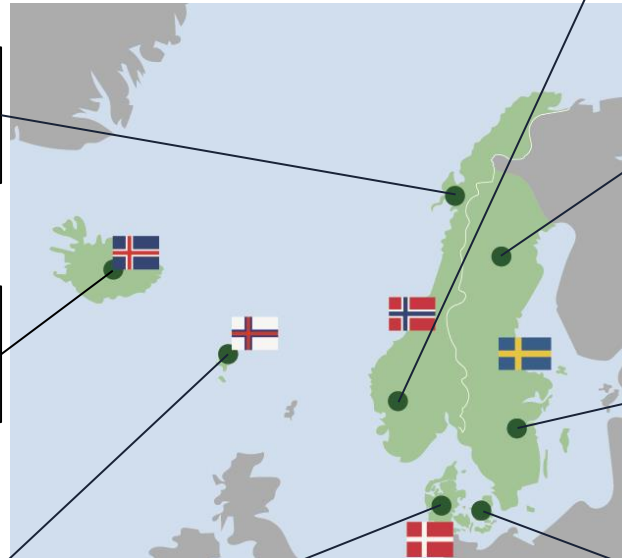

**Case 6**  
**Norway**  
**Flash floods**

**Case 7**  
**Iceland**  
**Avalanches**

**Case 8**  
**Faroe Islands**  
**Storms**

**Case 1**  
**Denmark**  
**Flooding**

**Case 2**  
**Denmark**  
**Cloudburst**

**Case 5**  
**Norway**  
**Landslides**

**Case 4**  
**Sweden**  
**Temperature extremes**

**Case 3**  
**Sweden**  
**Wildfires**
